5th Summit on Gender Equality in Computing
June 26-27, 2023

The Greek Chapter of ACM's Council on Women in Computing (Greek ACM-W) organizes the 5th Summit on Gender Equality in Computing. Despite the significant growth of Computer Science and Engineering and the exciting career prospects, there are still severe gender disparities in the STEM field, and especially in the computer science and engineering domain. The Summit aims at promoting gender-equal access to the computer-related scientific frontiers, encouraging and educating women and men in an equal way to achieve their goals and utilize their potential in digital professions. The goal of the Summit is also to celebrate and disseminate the achievements of computer professionals in a fair and gender-equal way.

Through a series of activities (including invited talks, workshops, panels, interaction with the industry, poster sessions, and other activites), attendees will have the opportunity to become acquainted to current and emerging topics and important achievements in computer science (CS), as well as to participate in discussions on gender equality issues in STEM (and more generally in academia, research and industry).

The Poster Session aims to offer the opportunity to undergraduate, graduate and PhD students as well as young researchers and professionals of any gender to engage with other researchers and professionals, disseminate research work, receive comments, practice presentation skills, benefit from discussing ideas with colleagues. **Poster Submission Guidelines:** http://gec23.aueb.gr/posters/, **Deadline: May 12, 2023**

More information about the event: http://gec23.aueb.gr/

Acknowledgements: The Greek ACM-W chapter would like to thank the Gender Equality Committee of the University of Crete and the Institute of Computer Science of FORTH for sponsoring the event with travel grants to students from the University of Crete to present their poster at the event.

Greek Chapter of ACM-W

The Association for Computing Machinery (ACM) is the world's largest scientific and educational computing society. The ACM is a non-profit professional membership group, claiming nearly 110,000 student and professional members worldwide. The Greek Chapter of ACM-W (ACM's Council on Women in Computing) was established in July 2018 with the vision of fostering gender mainstreaming, as well as enhancing and advocating gender balance in computer-related scientific fields and professional sectors in Greece**.** It is chaired by **Panagiota Fatourou,** Professor of the Department of Computer Science of the University of Crete and **member of the Gender Equality Committee of the University**. Its founding members number more than 40 women from academia, research institutions, and the computing industry from all over Greece and abroad. The Chapter's overall member base has exceeded 240 individuals of all genders. **More information:** https://acmw-gr.acm.org/en/, https://twitter.com/GreekAcm, https://www.linkedin.com/groups/8721327/
